

Bluetooth Mirror Hands Free Car Kit

Model BTHF-88-SC

Bluetooth The Rear view Mirror Hands Free Car Kit with Caller ID (BTHF-88-SC) is a wireless device that utilizes the latest Bluetooth technology to communicate with your mobile phone within a 10-metre range. This allows you to talk through its built-in high quality loudspeaker and external high sensitivity microphone without the need to hold the phone or take your hands off the steering wheel.

So easy to install, just simply clip the BTHF-88-SC unit over the existing Rear view mirror and once set up, you will be able to answer, end, reject, redial, place calls or adjust the loudspeaker volume by the simple press of a button, wherever your phone is in your car- there is no need to even remove your phone from your pocket or purse.

The BTHF-88-SC also supports voice dialling which enables you to dial your favourite contacts without the need to touch the phone and allow you to remain concentrated on safely driving your car. Or you can pick up the FM Headset instead talking over the Car Kit speaking and MIC.
