

Bluetooth Portable Hands Free Car Kit

- **Model:**
BTHF-09-DC

BTHF-09-DC Bluetooth Portable Hands Free Car Kit is a rechargeable speakerphone which is easy to operate in car and portable to use anywhere. It is specially designed for connecting Bluetooth compatible mobile phones without wires in car. No matter if the car is switched on or not, you can enjoy the freedom of wireless communication. No power connection or connect to the mobile phone. Using the single button control of the handsfree, you can make and answer calls without touching the mobile phone. You can even leave the mobile phone in pocket or anywhere inside the car. With built-in DSP circuit, echo and background noise are cancelled and suppressed effectively. Thus providing clear sound and high quality conversation even in noisy environment.
